Vigilance[®]

Impact-Resistant Replacement and New Construction Windows

Vigilance® windows were created to meet coastal building codes, among the most stringent followed in our industry. They provide exceptional storm protection, from not only wind and rain but also wind-borne debris.

The high-performance Harvey Vigilance impact-resistant window lineup includes double hung, casement, awning, and picture window styles. These windows can be used in both new building construction as well as replacement applications.

- Standard ENERGY STAR® glazing
- Impact rated with minimum performance of DP55-120mph
- STC 34 rating for excellent noise reduction
- Top and bottom sash tilt-in for easy cleaning (double hung)
- Low profile, corrosion-resistant hardware
- Factory calibrated constant force balances never need adjustment or lubrication (double hung)
- Locking fiberglass half screen (double hung)
- Laminated & double-strength glazing system

Interior Trim Kits

Harvey interior trim kits provide quality workmanship and a precision fit. Kits are available in seven different popular profiles in either clear or primed pine.

2-1/4" Beaded
Colonial

3-1/2" Windsor

Interior trim available for new construction styles only.

Extension Jambs

- Primed finger joint or clear pine
- 4-9/16"
- 6-9/16"
- Custom sized up to 7-1/4" wall

Hardware

Corrosion-Resistant Cam Lock
(White)

Additional Options

- Structural Mullion
- Half or Full Screen**
 - Fiberglass Wire (standard)
 - Aluminum Wire
 - Virtually Invisible (VIEWS)

Thermal Performance - Vigilance Double Hung

For the most up to date structural and thermal performance values, as well as other product specifications, visit harveybp.com.

Glazing	U-factor	SHGC	Visible Light Transmittance	ENERGY STAR Compliance
ENERGY STAR	0.27	0.20	0.45	N,NC,SC,S
ENERGY STAR w/Grid	0.27	0.18	0.40	N,NC,SC,S

Structural Performance - Vigilance Double Hung

Unit Size	Air Infiltration	Water Resistance	Structural Pressure	Design Pressure	Structural Rating
Replacement 42x72	.10 cfm/sq. ft.	9.82 psf	105.33 psf	DP70	H-R70
New Construction 42x72	.10 cfm/sq. ft.	9.20 psf	97.81 psf	DP65	H-R65

ENERGY STAR: This package includes everything that is needed for a product to meet ENERGY STAR requirements. Glazing, gas, glass thickness, etc. will vary by window and usually includes Low-E coating and Argon gas. This glazing package does qualify for ENERGY STAR.

U-factor measures the rate of non-solar heat transfer from one side of the window to the other. Heat transfer implies both heat loss out of a living space during cold weather and non-solar heat gain during hot summer months. The lower the U-factor, the better the performance.

Solar Heat Gain Coefficient (SHGC) measures how well a product blocks heat from the sun. The lower the SHGC, the better a product is at blocking unwanted heat gain.

Visible Transmittance (VT) measures how much light comes through a product. The higher the VT, the more light that comes through.

Design Pressure (DP) measures the wind load pressure that a product is rated to withstand.

About Harvey Building Products

Harvey has built a solid reputation as a leading manufacturer and distributor of quality building products. A privately owned and operated business with over 50 years' experience, Harvey Building Products is known for outstanding craftsmanship and superior service as well as standing behind every product we make. In addition to manufacturing durable, attractive windows, doors and porch enclosures, Harvey distributes a full line of highly respected building products to professional contractors and builders throughout the Northeast.

We understand what it takes to be part of your home.®
